### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Charles E. Kosinski. (Reg # 39254). on 05/26/2010 via email and phone. The newly submitted abstract will not be entered as per the conversation and as such the old abstract filed with the application remains in affect.

The application has been amended as follows:

**5. (canceled)**

**9. (currently amended)** An imaging device which includes a two-dimensional field of image sensors as well as an evaluation unit which is capable of reading out and processing the pixel signals, representing output signals of image sensors combined by a binning operation, at a maximum rate of no more than  $G_{\max}$ , the imaging device being configured to enable presetting of at least one parameter in order to define a sub-region of the field, and further configured for deriving any remaining parameters for defining the sub-region as well as a binning factor  $b$  and an

imaging rate  $f$ , said deriving being performed, in view of the at least one preset parameter, in such a manner that the maximum rate  $G_{\max}$  of the evaluation unit is not exceeded during the reading out of all pixel signals from the sub-region[.], the location of said sub-region within said field being unique and corresponding to said at least one parameter and said any remaining parameters.

10. (canceled)

19. (currently amended) An article of manufacture, comprising a non-transitory computer-readable medium having instructions encoded thereon for enabling a processor to perform the method of claim 1.

20. (currently amended) A computer software product for use with an evaluation unit capable of reading out and processing pixel signals of a two-dimensional field of image sensors at a maximum rate of no more than  $G_{\max}$ , said field being dividable into pixels for outputting said pixel signals representing output signals of said image sensors combined by a binning operation at a binning factor of unity or greater, said product comprising a non-transitory computer readable medium embodying a computer program that includes instructions executable by a processor to perform a plurality of acts, said plurality comprising the acts of:

presetting at least one parameter in order to define a sub-region of the field, said sub-region comprising less than all of said field, but a plurality of said pixels; and

based on said at least one preset parameter and on said maximum rate  $G_{\max}$ , deriving, by said imaging device, a) any parameters for defining the sub-region that were not preset in said presetting, b) said binning factor, c) an imaging rate.

**22. (canceled)**

**24. (new)** The method as claimed in claim 21, wherein said deriving comprises following, by said imaging device, specified rules in conformity with which variables are changed relative to their current values in order to ensure that the maximum rate  $G_{\max}$  is adhered to.

**25. (new)** An imaging device as claimed in claim 15, further comprising:  
a beam path; and

an X-ray apparatus with an adjustable diaphragm arrangement in the beam path, said arrangement including an adjustable diaphragm device, said apparatus being configured such that at least one adjustment parameter of said diaphragm device is among said at least one preset parameter.

The following is an examiner's statement of reasons for allowance: In view of the arguments/amendments dated Feb 24 2010 and the closest prior art on the record as cited in PTO 892 Independent claims 1,9,15,16, 19 and 20 are allowed. Dependent claims 2-4,6-8,11-12,17,21,23-25 are dependent on the allowed claims therefore they are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAYESH PATEL whose telephone number is (571)270-1227. The examiner can normally be reached on 5-4-9.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samir Ahmed can be reached on 571-272-7413. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
